PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented BI Developer with 6 months of hands-on experience in dashboard development, data modeling, and end-to-end BI solutions. Adept at using Qlik Sense, SQL, and cloud tools to transform raw data into meaningful insights. Successfully developed and deployed production-level applications for enterprise clients, with a strong focus on performance, testing, and client collaboration. Quick learner with exposure to Databricks, basic Snowflake, and agile development practices.

EXPERIENCE

Data Analyst and BI Developer ,

Fipsar solutions , Chennai

Mar '25 - present

- Joined the BI team as a fresher on a critical, enterprise-level dashboard project for an international company.
- Develop and deploy production-ready BI applications in Qlik Sense.
- Designed and built two complete Qlik Sense apps from scratch:
- Channel Management App: Developed a 3-sheet dashboard that integrated data from shipping, inventory, and multiple business domains, utilizing complex joins and aggregations across the full database.
- Quarterly Review App: Built a management-focused, single-sheet report for leadership presentations, focused on key performance trends.
- Wrote optimized SQL queries to perform data validation, model accuracy checks, and logic debugging across large datasets.
- Conducted SIT (System Integration Testing) and UAT (User Acceptance Testing), ensuring business alignment and data accuracy.
- Maintained clear documentation covering app logic, validation steps, and user workflows.
- Participated in client calls, translating business feedback into functional improvements and visual updates.
- Used JIRA for sprint tracking, issue resolution, and collaboration within the agile development cycle.
- Successfully delivered both applications on time with zero critical defects.
- Received positive feedback from senior team members and clients for quality and initiative.
- Also I was a part of the Hypercare team for this project

AWS Cloud Data Engineering (Training Project),

Fipsar Solutions , Chennai

Mar'25 - Mar'25

- Transformed a traditionally local Python-based data ingestion assignment into a cloud-native pipeline using AWS services.
- Deployed a Python script on an EC2 instance to consume JSON data from a public API (JSONPlaceholder) using the requests library.
- Parsed and cleaned the data, then inserted it into a PostgreSQL database hosted on Amazon RDS, after designing an appropriate schema.
- Set up Apache Airflow on EC2 to orchestrate and schedule the entire pipeline with task retries, logging, and dependency control.
- Enabled CloudWatch monitoring to track EC2 and Airflow logs for better observability and alerting in case of failure.
- Delivered a fully functional cloud pipeline simulating real-time ingestion and processing, aligning with modern data engineering best practices

SKILLS

BI Tools: Qlik Sense, Power BI , Tableau
Programming: Python, SQL
Cloud Services: AWS EC2, RDS, S3 , CloudWatch
Data Tools: Databricks, Snowflake (basic), PostgreSQL, MySQL , Excel
Orchestration: Apache Airflow
Others: JIRA, UAT/SIT, Data Validation , Mashup (basic), Data analysis , Data modeling , Machine Learning

ACADEMICS

Mahaguru Institute of Technology (MIT) Kerala, India <i>CGPA: 7.68/10</i>	<i>Sep '20 - June '24</i> <i>B-Tech (Computer Science)</i>
Bharatiya Vidya Bhavans Vidya Mandir Thrissur , Kerala <i>CGPA: 7/10</i>	<i>June '18 - Mar '20</i> <i>Higher Secondary</i>
Govt Technnical School Krishnapuram , Kerala <i>CGPA: 9.5/10</i>	<i>June '15 - Mar '18</i> <i>High School</i>

CERTIFICATION:

Machine Learning using Python ,
Association of Computing Machinery (ACM)
Sep'23 - Feb'23

- Explored foundational machine learning concepts: Developed a solid understanding of supervised and unsupervised learning, model evaluation techniques, and practical implementation of ML algorithms.
- Hands-on experience with Python libraries: Gained proficiency in essential libraries like scikit-learn, NumPy, and pandas, enhancing skills in data manipulation and model building.
- Strengthened analytical skills: Built a foundation
